

Get started with the Owl

1. Turn your Owl over and plug in the USB cable and power adapter.

2. Plug the USB cable into your computer, and plug the power adapter into an outlet. Wait until Owl's eye stop pulsing, and you hear a hoot. Now your Meeting Owl is ready to use.

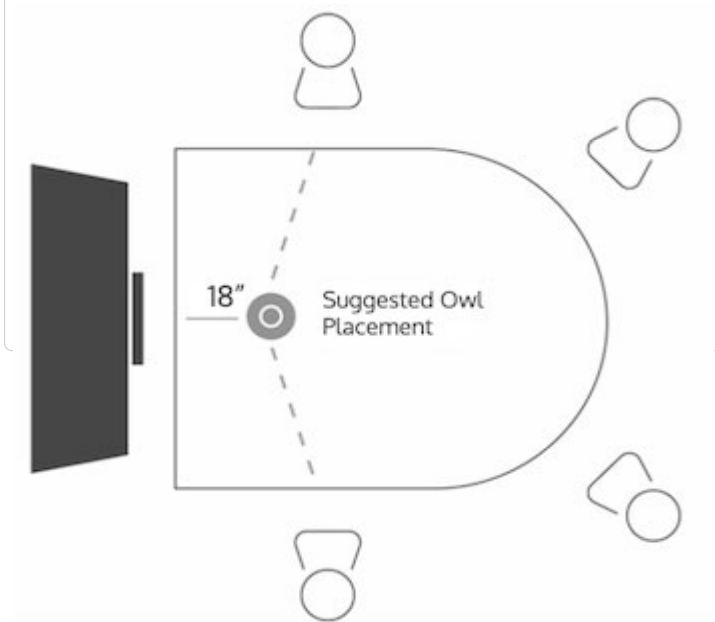

3. Open your video conferencing platform and select the Meeting Owl as your video, microphone and speaker. Now you are ready to start your meeting! Your Owl's eyes will illuminate when video is streaming.

The Owl learns where people are sitting in the room. If a new person sits at the table, or if you speak, then move to another location and speak again, it can take up to 5 seconds for the video to switch. Switching may take longer the further away you are sitting from the Owl.

See other side for Owl placement.

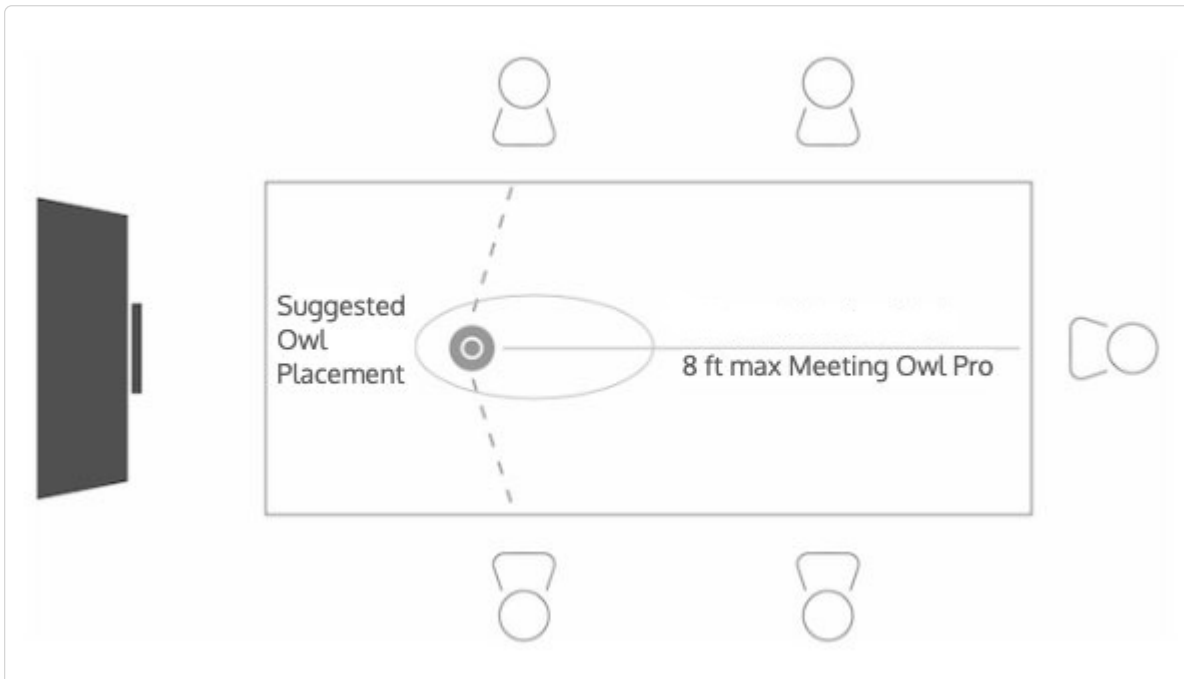

4. Place your Owl on your table or on the tripod.

- In a small huddle room that fits 2-4 people, place the Owl in the center of the table, at least 18" (0.5m) from the TV.

In a larger room:

- **Meeting Owl Pro** (up to 15ft X 20ft)
 - Place the owl in the center of the table, at least 3ft from the TV, but no more than 8 ft from the farthest participant.

Feel free to experiment with the placement of the Owl to best suit your meeting's needs.
